

Tierrasanta Community Council priorities for Capitol Improvement Funds as approved on 7-17-13 Vote 11-0 submitted by Deanna Spehn, TCC Secretary

The Tierrasanta Community Council (TCC) publicly noticed its intention to review its Capitol Improvement Project (CIP) priorities in late summer 2012 in the *Tierra Times* community newspaper, mailed to 10,000+ homes in the 92124 community. The matter was referred to the Community Development Committee (CDC) and following meetings on April 25th and June 4th, the CDC presented its recommendations at the June 19th TCC meeting.

The TCC received public comment and discussed the list in June and notified the community that the list was scheduled for a vote at the July 17, 2013 TCC meeting.

The CDC did not develop one list of priorities, deciding instead to retain the categories of Community Facilities, Parks/Americans with Disabilities Act (ADA) Compliance, Public Safety, Quality of Life, and Recreation.

At the July 17, 2013 meeting of the TCC, it was moved, seconded and approved unanimously (11-0) to approve the list of recommendations as submitted by the Community Development Committee with one two changes: Under “Community Facilities” replace “Senior Center/Teen Center” with “Community Center,” and that the #1 priority for the TCC is removing the extension of Tierrasanta Blvd. east to Mission Gorge/Princess View; removing the extension of Clairemont Mesa Blvd. east through Mission Trails Regional Park to connect with Jackson Drive; and removing the extension of Santo Road south to Friars Road.

The CIP projects on the list below are ranked within each category, but the TCC decided not to prioritize one category of projects ahead of another.

Community Facilities	Improve Parks/ADA Compliance	Public Safety	Recreation Facilities
Expanded library	Tierrasanta Com. Park	Traffic calming	Dog Park
Community Center	Monserate Park	Field lights*	Skateboard Park
Community garden	Roadrunner Park	2 nd Fire Station	Sand volleyball
	Tierrasanta Norte Park		

Notes on above:

- All four of the public parks in Tierrasanta have problems re: ADA compliance. Until the ADA work is done, we are limited in making improvements to tot lots, play equipment, installing shade structures, etc.
- Traffic calming refers to dealing with speeding issues on #1: Antigua Blvd. between Clairemont Mesa Blvd. and Santo Road; #2 Orleck and Santo Road; #3 Snook; #4 Kumeyaay Elementary
- Field Lights refers to using the existing funds paid by the Copperleaf development to install light(s) on the fields at Tierrasanta Community Park without linking the project to expensive ADA projects that are not currently funded
- The TCC requests updated cost estimates for the projects and an updated list of funds, by category, that are available for use in the Tierrasanta community.
